## CURRENT ROLE

# Senior Software Engineer

## COMPANY

Fidelity Investments

## DATES (CONTRACT ROLE)

September 2018 - September 2019

## DESCRIPTION

- Building the front-end user interface for an equity trading mgmt. tool using Angular, Typescript, RxJS, Sass, and WebSockets.
- Leading design discussions, demoing, code reviewing, mentoring, innovating, technical writing, and sharing best practices.
- Integrated the UI with web service REST APIs for CRUD operations.
- Implemented WebSockets for async actions & notifications, allowing the UI to auto refresh components automatically.
- Rolled out the Protractor framework for e2e testing, which increased dev & debug time substantially; as well as catching many bugs.

## SKILLS

### PROGRAMMING LANGUAGES & TECHNICAL SKILLS

HTML5, CSS, JavaScript, ES2015+, TypeScript, Angular (v6), RxJS, Sass, Angular Material, PrimeNG, ag-Grid, NPM, REST, SOLID, HTTP, BASH, NodeJS, ExpressJS, NestJS, JAMStack
